Banner Prints

Artwork Requirements

- All artwork must be in CMYK. RGB needs to be converted to CMYK.
- Remove registration, crop & trim marks.
- We don't have all fonts on hand, fonts in your file must be converted to outlines (curves / paths).
- 100% scale for artwork. Your artwork must match the dimensions of the product.
- Embed all images and content to the document.
- 30mm Bleed on all sides to allow for overprint and error.

- Minimum of 130DPI accepted for images embedded into the artwork (full size).

- Please upload your artwork online. You can also email it through to artwork@versmedia.com.au or share with our Google Drive using the above email.

Bleed Area Configuration

!! DESIGN AREA !! !! BLEED AREA !! !! CUT OFF !!

Please keep your design within the design area and not in the bleed area.

30mm

Any content/artwork in this area could be lost! We recommend this space for full coloured edges.

Anything that falls outside of the red line will definitely be removed from the print.

BLEED AREA - Colour Fill

Use the 30mm bleed area for full colour coverage of your background. This 30mm area will be used to fold around the back side during the hemming process (if required).

Edging Information

Eyelets:
We will place eyelets throughout your banner print. This includes one in every corner and throughout the length of the banner (quantity depends on the length of the banner).

Eyelets with Hemmed Edges:
Same features as above, except we will be hemming the edges which provides extra strength through out the banner.

No Edge Finishing Required:
The banner print is left as is. No treatment or finishing involved.

Hemmed Edges & Roped:
We will hemm the edging of the top and bottom and feed a rope through the banner, allowing you to fasten it to your fixtures, fencing and more. 2 extra metres of rope (+ the banner length) is supplied for your convenience.
