Coflute Signs

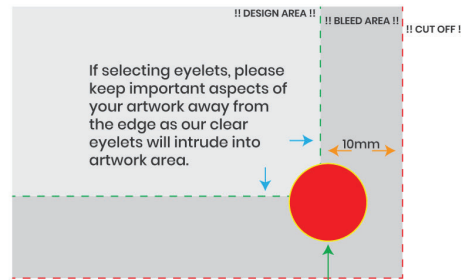

Artwork Requirements

- All artwork must be in CMYK. RGB needs to be converted to CMYK.
- Remove registration, crop & trim marks.
- We don't have all fonts on hand, fonts in your file must be converted to outlines (curves / paths).
- 100% scale for artwork. Your artwork must match the dimensions of the product.
- Embed all images and content to the document.
- 10mm Bleed on all sides to allow for overprint and error.
- Minimum of 130DPI accepted for images embedded into the artwork (full size).
- Please upload your artwork online. You can also email it through to artwork@versmedia.com.au or share with our Google Drive using the above email.

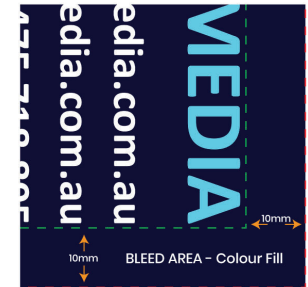

Bleed Area Configuration

Anything that falls outside of the red line will definitely be removed from the print.

This is the clear rivet hole, it is 12mm in diameter. It must be positioned away from the edge toward the design area, to ensure the coflute signs longevity.

Use the 10mm bleed area for full colour coverage of your background. Don't place any important content into the bleed area.

Extra Information
